1. LCD
2. USB Port
3. Strap-eye
4. Power Switch
5. UP button
6. Down button
7. Menu button / OK button / Start button

Note: The Digital Frame would start by extended pressing

### III. Prepare Your Device for Use

#### Charge Your Photo Frame

The battery indication is displayed on the LCD. It would display 📌 when the battery is running low and display ✅ when charge is completed. Please charge the battery by USB power from your computer.

**USB Power:** charge the frame with power indicator displayed. Meanwhile, it could show photos in memory during charge process

**USB Update:** connect the frame with PC to realize weather report, event reminders, online album and photos management
IV. Start Your Internet-Enabled Digital Frame

Turning On/Off

Cold Start: For the initial use, switch the Power button to “ON” to turn on Digital Frame.

Warm Start: When Power button being switched to ON, press and hold M for 2 seconds to start the device. It’s recommended to turn on Digital Frame by warm Start.

Cold Close-down: Switch the Power button to “OFF”. It’s recommended not to cold close-down your Digital Frame unless it would not be in use for long period. (Refer to Note)

Warm Close-down: press Menu button M to access the SETUP menu; then refer to following instructions to finish setting:

1. Select “Power Off” by pressing M
2. Select “Yes” by pressing M

Note:
When Power button being switched to “OFF”, the Digital Frame would power off and all the function settings (eg. time, alarm, language and auto sleep, etc.) have been reset to default settings.

About SETUP Menu

All the function settings for the Internet-Enabled Digital Frame are controlled via the buttons located on top of the Frame. Press the M button to enter SETUP menu and refer to following Menu table before setting your Digital Frame

V. Photo Management

Digital Frame Driver is a tool required to import photos to display on your Digital Frame. Please install and run this software to transfer images from your computer to Digital Frame after connecting it to PC.

Connect to PC

1. Connect the Digital Frame to PC via the USB connection cable as shown

   A new icon would appear on the task tray

2. Select “USB Update” on your Digital Frame

Software Installation

Insert and run CD provided on your computer CD-ROM. Click “Install Digital frame Driver”; then follow the on-screen instructions to complete the installation:

Step 1: Click “I Agree”
Run Digital Frame Driver

Please right click icon in task tray and choose “My Digital Frame” to access photo management interface as shown:
**Refresh**: Update photos in your Digital Frame

**Add**: Add new photo to preview and edit

**Save**: Save the photos to Digital Frame after deletion or edit

**Delete**: Delete selected photos from Digital Frame

**Delete All**: Delete all photos from Digital Frame

**Close**: Exit photo management

**NOTE:**
1. Do not attempt to access Digital Frame on the computer directly as a removable disk. It is only accessible via the Digital Frame Driver.
2. Before starting Digital Frame Driver, make sure to connect Digital Frame to your computer via the USB cable.
Downloading Photo onto Photo Frame

Step 1: Click to select images to be converted

Step 2: Preview and edit Photo

- Rotate -90: Rotate the image 90° counter-clockwise
- Rotate 90: Rotate the image 90° clockwise.
- Add: Click to finish edit
- Cancel: Cancel editing and previewing photo

Step 3: Click button to finish editing

Step 4: Add another photo by repeating “step 1” to “step 3”

Step 5: Click button to finish downloading
Deleting Photo from Photo Frame

**Step 1: Select photo to be deleted**
Use “Ctrl + Click” or “Shift + Click” to select multiple photos

**Step 2: Click button to delete selected photo**

**Step 3: Click to delete all the photos**

**Step 4: Click button to finish deletion**

Note:
① Digital Frame will display “Write OK” when complete downloading and deletion
② Take care not to pull out USB cable during downloading and deletion

Disconnect Digital Frame from PC

Your Photo Frame is a Mass Storage device. In order to successfully remove your Photo Frame device please don’t disconnect the USB cable directly, this may result in the photos not being displayed in the Photo Frame.

1. Double click the “Safely Remove Hardware” icon that appears on the Task tray
2. Select the “Safely Remove Hardware” pop-up that appears.
3. The “Safely Remove Hardware” message box will appear.
4. Select the “USB Mass Storage Device” from the list of devices that appear.
5. Click the “Stop” button.
6. Please wait until Windows notifies you that it is now safe to unplug the device from your computer.

VI. Weather Report & Online Album & Events Reminder

This Internet-enabled Digital Frame goes beyond showing just pictures in it. It allows you to enjoy your online album, updated weather report and Google Calendar events reminder when Internet is accessible. Furthermore, you can employ it as your “second screen” to display photos in a selected folder on PC directly.

Weather Report

1. Connect the Digital Frame to PC and run Digital Frame Driver
2. Set weather report

**Step 1:** Right click icon in task tray and choose “Options”

**Step 2:** Select “Weather Forecast”

**Step 3:** Click “Add” to search and add cities

**Step 4:** Select city and click “OK” to finish city search
Step 5: Click “OK” button to finish weather report setting

- **Edit**: Edit the city’s name displayed on Digital Frame
- **Up** / **Down**: Change selected city’s sequence when displaying weather report on Digital Frame.
- **Delete**: Delete selected city

3. Display weather report on Digital Frame

1. Right-click icon, choose “Slide Show” and select “Weather Report”

2. Weather report would be show on Digital Frame

### Online Album Slideshow

1. Connect Digital Frame and run Digital Frame Driver
2. Set online album show

**Step 1: Right-click 📷 icon in task tray and choose “Options”**

**Step 2: Select “Picture” in “Option” panel**

**Step 3: Select Flickr as photos resource**

**Step 4: Choose interval time between pictures transition**

**Step 5: Choose the way to display photos**
Step 6: Click “Log in” to link to Flickr for sign in

Step 7: Click “READY” to finish Flickr setting
After finishing all above settings, the Internet-enabled Digital Frame would directly display your or your friends’ online album in Flickr on its LCD one minute later. Furthermore, it would auto display online album without visiting and signing in to Flickr when it connecting to PC and running Digital Frame Driver.

Direct Show Photos on Your PC

1. Right-click icon, choose “Options” and go to “Picture” panel

2. Choose “Local Folder” as photo recourse

3. Choose interval time between picture transitions (refer to Online Album Slideshow)
4. Choose the way to display photos (refer to Online Album Slideshow)

5. Locate folder where photos are

6. Click “OK” to finish setting; then right click icon, choose “Slide Show” and select “Album”

Then the Digital Frame would directly show any picture in selected folder without opening the folder. It could also display pictures as many as you want.

Google Calendar Events Reminder

1. Create Google Calendar account. Please click here to sign in or sign up to Google Calendar
2. Create your events in Google Calendar
3. Set Google Calendar events reminder in Digital Frame Driver

**Step 1:** Right-click icon, choose “Options” and go to “Google Calendar” panel

**Step 2:** Enter your Google Calendar ID and password

**Step 3:** Click “Apply” and “OK” to finish setting

Then the Digital Frame would synchronize your schedules with Google Calendar. And it would remind you of important events by buzz and notification.
Note:
① Stop alarm by pressing M
② It’s recommended to refer to Google Calendar webpage for the guide of Google Calendar.

VII. FAQ

Q1: Why did I see the 📅 icon rather than 📅 in the taskbar?
Check whether the Digital Frame fail to connect to your PC. Please ensure the connection between PC and the Digital Frame when running Digital Frame Driver.

Q2: Why the photos displayed are distortion?
Those picture files are bad. Please do NOT pull the USB cable during downloading or deleting pictures.

Q3: Why the Digital Frame turn off suddenly?
   a) Auto sleep function is activated. Please disable the auto sleep by select “Off” in Auto Sleep setting.
   b) The battery is out. Please charge the battery by USB supply.

Q4: Why the alarm does not work
   a) The alarm was canceled. Please ensure that the 🕵️‍♂️ icon was appeared during setting alarm.
   b) The Power Switch has been turned to “Off”, which would initialize the Digital Frame to default setting. It is strongly recommended to turn off Digital Frame by warm close-down. (refer to “Turn On / Off”)
